The South now educate her sons practically if she would develop her vast resources of wisdom which are much more numerous than those of Europe.

We have ample arrangements for 500 students during the current year.

Persons can make liberal conditions for their sons if they apply soon. Those from the country can board with the Professor of the College, or good families speaking English, French, Spanish or German, at moderate rates.

A business education, that enables one to earn \$2000 or \$3000 annually, is the best fortune one can give their sons. As the College has been in successful operation for more than a quarter of a century, and the practical plan here pursued received the unanimous commendation of the press and business community, and as several thousands of former students are now in business in this city and throughout the country, it is useless to go into an extended explanation of the plan and merits of this institution.

N. B. Not one of the several thousands of former students of this College is now out of business, so far as known, yet not one in a thousand of those who have been sent to Europe or the North is qualified for any business when he returns home, after having expended thousands of dollars.

The city is now healthy. Persons from 10 to 60 years of age attend such branches as they may wish. By having a special Professor for each branch three fourths of the student's time is saved. Students intended for this College should be sent to this circular or special directions, as every student there is temporary established. Young students should put their names in the hands of their masters, or the President of this College. Officers, Room No. 7.

President.
